

OUR REPUTATION IN EVERY BAG

Product Catalog

Leaders in can liners, trash bags,
and custom poly since 1977.

Dear Valued Customer,

Welcome and thank you for your interest in our company.

Aluf Plastics is a minority, woman-owned (WBENC Member) manufacturer of custom, retail, and private label trash bags. We've been in business under the same ownership since 1977 and maintain state-of-the-art facilities in Orangeburg, NY and Sulphur Springs, TX.

We've grown into one of the largest manufacturing and blown-film extrusion powerhouses in North America and yet maintain that personal one-on-one, individualized relationship with each and every customer.

Please take a moment to peruse through this catalog. Have questions? Need more information? Have a special request? Our knowledgeable Sales team is standing by to provide you with the answers and the attention you deserve.

We appreciate the fact that you've chosen to do business with Aluf Plastics and pledge to consistently serve you with the highest levels of dedication, reliability and professionalism.

Thanks again for you patronage.

Yours truly,

Susan Rosenberg

Chief Executive Officer

PICK A BAG. ANY BAG.

ALUF PLASTICS IS ALL ABOUT PROVIDING **EXCELLENT SERVICE** AND MANY TOP QUALITY PRODUCTS AT **COMPETITIVE PRICES**. FROM DUAL MANUFACTURING FACILITIES ROLLING OUT **CAN LINERS** OF ALL SIZES, TO **MULTIPLE WAREHOUSES** STOCKING OVER **500 READY-TO-SHIP SKUS** FOR IMMEDIATE DELIVERY, ALUF'S **STERLING REPUTATION** IS INSIDE EVERY BAG... **NO MATTER WHICH BAG YOU CHOOSE.**

General Information

General Info: Aluf Plastics extrudes and converts mono- and multi-layer bag products for industrial packaging and can liner applications. Since inception in 1977, Aluf Plastics has grown steadily with advancements of film and bag products. We offer a full line of commodity polyethylene as well as superior products of high performance resin, which reduces cost over traditional polyethylene products.

Plant Locations: Aluf’s East Coast headquarters and production facility is located in Orangeburg, New York, only 5 minutes from the New York/New Jersey border and Route 287/87 Interstate highways.

The Aluf Plastics Southwest division features a manufacturing and blown-film extrusion plant in Sulphur Springs, Texas that expands distribution to customers throughout the region.

Physical Data: Aluf Plastics runs 90+ extrusion lines between the New York and Texas plants with a total production space of approximately 500,000+ square feet.

	Minimum Gauge	Maximum Gauge	Minimum Width	Maximum Width
Prime:	.0004	6 mil	8” (16” Tube)	99” (178” gusseted)
Repro:	.0008	6 mil	8” (16” Tube)	99” (178” gusseted)
HD:	5 mic	25 mic	17”	52”

Converted Products: Minimum Bag Length: 12” Maximum Bag Length: Unlimited

- Capabilities:**

 - Individually Folded
 - Cored and Coreless rolls
 - Flatpack, Individually cut
 - Custom Sheets and Sheeting
- Drawstring & E-Z Tie Flaps
 - Gusset, Flat, Star Seal
 - Corona, ‘print’ treating
 - 2 Color Random Print

IT'S NOT ABOUT WHAT'S
IN THE BAG, IT'S ABOUT
WHAT'S **ON** THE BAG

Antimicrobial Can Liner Manufacturer

Antimicrobial Protection is well known for inhibiting the growth of odor-causing bacteria. Antimicrobial trash bags from Aluf provide important protection to help differentiate your offering with a solution that reduces unwanted bacteria.

Antimicrobial Protection is infused into the bag during manufacturing and will not wash off or wear away. It provides continuous protection for the duration of its use.

The antimicrobial feature can be added to any custom product.

Antimicrobial Protection is standard in these Aluf Commercial Product Lines:

HIGH DENSITY

LOW DENSITY

Film Designation

BIOFLEX BioFlex is a brand of additives from Aluf Plastics which enhance the biodegradation of plastic trash bags in a biologically active land fill (not available in all areas). ASTM D5511 tests that represent biologically active landfills on a representative trash bag have shown about 50% biodegradation in 2 years.

HIGH DENSITY Aluf Plastics HDPE film is a blend of high molecular weight, high density resins. High Density offers superior dart strength performance over all our other products, and is the ideal material to be used for non-sharp objects.

SUPER HEXENE Our strongest material; a linear low proprietary resin blend, that provides the strength necessary to replace conventional liner grade film, allowing down gauging up to 50% in many applications.

HEXENE A high quality blend of linear low resin used in applications where other materials may not be suitable. This resin blend is used to offset the blocking and stretch of LDPE, while maintaining strength and impact resistance; allowing down gauging of up to 35% in many applications.

BUTENE A linear low resin blend that can usually be down-gauged 20% when replacing a conventional liner grade film. This film is used for applications where other materials may not be suitable. This resin blend is used to offset the blocking and stretch of the LDPE while maintaining strength and impact resistance.

BUTENE HIGH CLARITY The advantages of Butene, with the added benefit of higher clarity, when required.

CXP COEX SUPERTUFF® Three-layer co-extrusions, formulated for a higher performance rate and produced with a minimum of 10% post consumer and 80% recycled material. CXP contains Antimicrobial protection and qualifies for LEED certification.

METALLOCENE/ALULENE BLEND Our exclusive blend of linear low recycled material and super strength prime resins. This material typically enables the user to utilize a bag 10% thinner, yet equal or stronger than a traditional LDPE bag, at a competitive price.

REPRO PLASTIC Aluf repro has consistently strong characteristics as it is a blend of our own virgin resins and outside recycled content. However, natural or clean film bags made from repro are somewhat cloudier than conventional industrial liner film, although contact clarity is sufficient for easy product identification. Repro plastic is not recommended for applications requiring FDA certification. 10% Post-Consumer additive is available upon request for most products.

ANTIMICROBIAL Antimicrobial Protection provides an added benefit by inhibiting the growth of odor-causing bacteria on the inside and outside surfaces of can liners. Aluf High Density products, PCM Pro-Lene and HCR Series as well as our Lo-Density LEED CXP and RCM products are manufactured with Antimicrobial Protection.

BIODEGRADABLE & COMPOSTABLE Aluf compostable and biodegradable bags are BPI Certified and made with natural polymers, including potato and corn starch and meet ASTM D6400 specifications. Bags are able to decompose under specific conditions of light, moisture and oxygen.

Custom Labeling Options

CO-LABEL OPTION

A 3x4 co-label can be applied to all stock products and may contain your reorder information on a standard label or a custom reorder label with your logo and company information.

Please allow five days lead time.

STANDARD CO-LABEL
3x4 label with 5 lines X 20 characters per line.

ADVANCED CO-LABEL
3x4 Label with customer logo and reorder info.

CUSTOM LABEL OPTION

A fully custom 3x4, 4x6 or 4x13 black & white label can be applied to all custom products, with a minimum order of 250 cases per item.

Please allow 3-4 weeks lead time.

Advanced 4x6 custom label with customer logo, address and bag specs.

Advanced 4x13 custom label with customer logo, address and bag specs.

PLEASE NOTE: All boxed red areas on the labels are Aluf internal data and cannot be moved or removed from any of Aluf custom or co-labels.

WHERE ARE YOU ON YOUR JOURNEY TO SUSTAINABILITY?

Whether you're an eco-starter or an environmentalist, we're all looking to make smarter choices for our planet. Reducing pollution, shrinking landfills and keeping natural resources intact are all paths that lead to a more sustainable future.

Wherever you are on your sustainability journey, we've got a bag for you.

Enhanced Biodegradation Bags
Add **BioFlex** technology to (almost) any of our bags to enhance their biodegradation in a biologically active land fill (not available in all areas). ASTM D5511 tests that represent biologically active landfills on a representative trash bag have shown about **50%** biodegradation in 2 years.

Reduced Resin Content Bags
Less polyethylene than traditional liners yet strong and durable enough to get the job done.

**OUR PRODUCTS ARE
PCR COMPLIANT UP TO 30%**

Compostable Bags
BPI Certified and made with natural polymers, including potato and corn starch and meet ASTM D6400 specifications. Bags are able to decompose under specific conditions of light, moisture and oxygen.

Reprocessed Bags
Made with at least **90%** recycled materials, up to **20%** post-consumer content, our proprietary formulation of sustainable materials outperforms the competition.

Our Sustainability Journey

- We operate our NY and TX manufacturing plants as zero waste facilities
- All internal plant scrap gets reincorporated into our products
- Every year we recycle 50 million pounds of plastic packaging
- Our facilities reuse over 25,000 gallons of wastewater a week
- Each year we recycle 1,000 tons of cardboard
- 3,000 gallons of oil from our machinery is recycled yearly
- As part of our buy-back program, we source scrap from other manufacturers and end users that we recycle to make new bags

HCR High Density

HCR Hi-Lene is our preferred value line, available in a wide range of industry standard sizes and gauges.

These bags have the additional benefit of Antimicrobial protection, which inhibits the growth of odor-causing bacteria on the inside and outside surfaces of the bag.

VCX COEX Supertuff®

VCX COEX Supertuff Bags are a highly engineered tri-laminate product, that incorporates extra strength at lower gauges, providing an advantageous cost compared to traditional black bags. These bags are star-sealed for leak-proof protection.

- **Tri-laminate 2-color film** — provides superior strength and elasticity for exceptional performance at a value price
- **COEX technology** — uses less PE for improved sustainability
- **Star Seal** — provides leak-proof bottom
- **Minimum 80% recycled materials**

Curbside Receptacle Liners

Curbside Receptacle Liners are specifically designed to fit standard 65 and 95 gallon roll out receptacles. Made from low density polyethylene for strength and flexibility.

Curbside Receptacle Liners are available in Black and Clear for general refuse and building materials and are gauged accordingly.

- Recycled liner, low density polyethylene
- Puncture and tear resistant
- Designed to fit standard 65 and 95 gallon curbside receptacles

Black Tubing and Compactor Bags

Maintaining our continual commitment to the big city market, we have identified and stock the most popular Compactor Bags and Tubing sizes for your convenience. Tubing can be sized to any length by simply cutting and twist-tying the ends.

Manufactured from a rugged blend of reprocessed material in an extra heavy thick gauge. Packed in a brown carton on a 3 inch core.

Clear 50/50

Clear bags are excellent for recycling and indispensable for identification or security purposes. Made from a blend of clear recycled and virgin resins. These are our heaviest and most popular clear bags.

Poly/Food Bags

Our selection of FDA approved food bags are manufactured from virgin, high-clarity resin and are conveniently packaged in white dispenser cartons.

FOOD BAGS

Perfect for packaging a variety of foods, including bakery items, cheese, meat and frozen food products.

ICE BUCKET BAGS

Manufactured from high-impact virgin resin and designed to withstand extreme cold temperatures.

UTILITY ROLLS

Extremely versatile bags. They are ideal for a variety of applications, including bakery, produce and small parts inventory; packed in a white box on a 1.5" core.

Aluf's high-clarity FDA approved bags are perfect for packaging foods of all types

INDUSTRIAL POLY

Industrial Poly Products Include:

Pallet Covers and Gaylord Liners

Available in custom sizes and standard colors. Virgin and Repro Low Density material.

Box Liners

Available for industrial, food processing and retail applications in Low Density Polyethylenes, manufactured in Butene, Super Hexene, LLDPE or Repro.

Industrial Bags and Sheeting

Available flat pack as well as on a roll.

Custom Capabilities

Bags: Flat Pack
Cored Rolls
Coreless Rolls

Sheeting: Center Slit
Center Fold
Center Slit Gusseted
Double Wound Sheeting

Tubing: Continuous Tubing from 10" to 99" wide
Gusseted Tubing to a maximum of 178" wide
Perforated Tubing/Sleeves
Bags on a Roll
Roll diameters up to 11" depending on size

Materials: LLDPE, Hexene, Super Hexene. Butene, Butene High Clarity, Coex Super Tuff CXP, Metallocene/AKA Alulene Blend

All prime resins are FDA approved. Repro, antimicrobial, additives, ultraviolet blockers, tints and colors, non-slip, medium slip, high slip, fractional melt, anti-static and compostable materials are available.

SLIM-FIT GUIDE

Poly Sheeting

Gritty construction dust is the bane of any remodeling project or large home repair job, whether you're hiring a contractor or doing the work yourself. Dust can damage furniture and rugs and ruin the finish on a hardwood floor.

Bag Choosing Guide

How to choose the correct can liner in 3 easy steps.

STEP 1 – MATERIALS: Are there sharp objects being thrown away?

YES – Select one of the following options: NO – Select one of the following options:

SHARP OBJECTS	Low Density High Mil	Low Density Med Mil	Low Density Low Mil	LD Super Hexene Med Mil	LD Super Hexene High Mil
Construction Debris	3 mil				
Broken Glass		2 mil		1 mil	
Items with Sharp Corners			1.5 mil		.8 mil
Lawn Trimmings & Sticks			1.5 mil	.9 mil	
Bones, Crab Legs, Sharp Metal Lids				.9 mil	.8 mil

GENERAL WASTE	LD Super Hexene Low Mil	High Density High Mic	Low Density Low Mil	High-D Low/Med Mic	High Density Low Mic
General Food Waste	.7 mil	17 mic	14 mic		
Newspapers & Magazines		14 mic		1 mil	
Rags/Linens		12 mic	10 mic		.8 mil
Office Waste	.4 mil		1.5 mil	8 mic	
Tissues					6 mic

STEP 2 – SIZE: How to determine the proper liner size? Follow these steps:

Round: Example:

Diameter: 23” Height” 42.5”
Width = diameter x 1.57
23” x 1.57 = 36.11” = 36”

Length = 1/2 diameter + 4” + height of can
Length of bag = 58”
11.5” (1/2 dia.) + 4” + 42.5” = 58”

Bag Size should be:
36" x 58"

Square/Rectangle: Example:

Width: 22” Depth: 14” Height” 47”
Width = add the width + the depth
Width of bag = 36”
22” + 14” = 36”

Length = 1/2 of the depth + height of can + 4”
Length of bag = 58”
7” + 47” + 4” = 58”

Bag Size should be:
36" x 58"

STEP 3 – GAUGE: How to determine bag thickness?

HI-DENSITY	
Gauge	Max Load
6	16
8	20
10	30
13	55
14	55
16	70
17	75
19	80
22	85

REPRO & POST	
Gauge	Max Load
0.8	32
1.0	40
1.2	48
1.3	52
1.5	60
1.6	64
1.7	68
1.9	76
2.0	80

ALULENE	
Gauge	Max Load
0.8	36
1.0	45
1.2	54
1.3	59
1.5	68
1.6	72
1.7	77
1.9	86
2.0	90

BUTENE	
Gauge	Max Load
0.4	22
0.6	33
0.7	39
0.8	44
0.9	50
1.0	55
1.3	72
1.5	83
2.0	110

HEXENE	
Gauge	Max Load
0.4	28
0.6	42
0.7	49
0.8	56
0.9	63
1.0	70
1.3	91
1.5	105
2.0	140

SUPER HEXENE	
Gauge	Max Load
0.4	30
0.6	45
0.7	53
0.8	60
0.9	68
1.0	75
1.3	98
1.5	113
2.0	150

Converting Gauge

Can Liner Mil and Micron Conversion Formulas

How to Convert Mils to Microns

Multiply the Mil by 25.4

_____ Mil x 25.4 = _____ Microns

The resulting number is the actual Micron thickness.

How to Convert Microns to Mils

Divide the Micron by 25.4

_____ Microns ÷ 25.4 = _____ Mil

The resulting number is the actual Mil thickness.

This table highlights the most popular can liners in both gauge and microns	
MIL THICKNESS	MICRON EQUIVALENT
0.20	5
0.24	6
0.28	7
0.31	8
0.35	9
0.39	10
0.43	11
0.47	12
0.51	13
0.55	14
0.59	15
0.63	16
0.67	17
0.71	18
0.75	19
0.79	20
0.83	21
0.87	22
0.91	23
0.94	24
0.98	25
1.00	25.4

Calculating Gauge

Calculating Bag Thickness

1. Weigh 4 bags in pounds on a scale to get an AVERAGE weight.

If scale provides weight in OUNCES divide by 16; or if by GRAMS, multiply x .0022 to get pounds.

2. For width and length below use ACTUAL exact length you physically measured, not what is on the label.

For Low Density

Weight in lbs. ÷ Total Width ÷ Length ÷ # of bags weighed x 15 = Gauge

For example see below

Try it _____ lbs. ÷ _____ Width ÷ _____ Length ÷ _____ # of bags weighed x 15 = _____ Mil

i. Example: 29.4 Net Weight 38x58, 2 mil, LLDPE 100 count =

ii. 29.4 lbs. ÷ 38 width ÷ 58 length ÷ LLDPE 100 count x 15 =

.002 mil

For High Density

Weight in lbs. ÷ Total Width ÷ Length ÷ # of bags weighed x 15 = Gauge

For examples see below

Try it _____ lbs. ÷ _____ Width ÷ _____ Length ÷ _____ # of bags weighed ÷ 0.0686 x 25,400 = _____ Micron

i. Example: 20.75 Net Weight 40x48, 16 Micron HDPE 250 count =

ii. 20.75 lbs. ÷ 40 width ÷ 48 length ÷ 250 count ÷ 0.0686 x 25,400 =

16 mic

Calculating Net Weight

For Low Density

Gauge ÷ 15 x Total Width x Length x Pack = Net lbs. per case

For example see below

Try it _____ Gauge ÷ 15 x _____ Width x _____ Length x _____ Pack = _____ Net Weight per Case

i. For LD gauge, please input 1.5 mil as .0015 or .5mil as .0005

ii. Example: 40 x 46, 100 Case, 2 Mil =

iii. .002 ÷ 15 x 40 Total Width x 46 Length x 100 Case =

24.53 Net lbs. per case

For High Density

Gauge ÷ 25,400 x Total Width x Length x Pack x 0.0686 = Net lbs. per case

For example see below

Try it _____ Gauge ÷ 25,400 x _____ Width x _____ Length x _____ Pack x 0.0686 = _____ Net Weight per Case

i. For HD gauge, please input 17 Mic as the value of 17 ÷ 25,400 = .0006692

ii. Example: 33 x 40, 250 Case, 17 Mic =

iii. 17Mic ÷ 25,400 = .00066 x 33 Total Width x 40 Length x 250 Case x .0686 =

15.15 Net lbs. per case

Frequently Asked Questions

How can I order product samples?

Call your local representative, or contact Customer Service at 800-394-BAGS or info@alufplastics.com to request product samples.

What Freight Terms do you offer?

Prepaid, unless otherwise noted.

How can I tell the difference between Low Density and High Density bags?

Low Density bags feel and sound softer, and are usually thicker. High Density bags are thinner and make a crinkly sound.

Can I buy direct?

Being a manufacturer, our products are sold by our wholesale distributor partners. We can refer you to an Aluf Plastic's Manufacturer Rep or local distributor in your area depending upon your volume needs.

Can I mix products to meet the 250 case minimum for prepaid freight?

Yes, you can mix assorted items, full case layers are preferred, to have the entire order meet our 250 case requirement.

What is the difference between Mic and Mil?

Mic and Mil are units of measure that describe the thickness of plastic. High Density is measured in microns or the metric system. Low Density is measured in mils or the imperial system.

What are the minimum order requirements?

The minimum production run for custom items is usually 2,000 lbs.

Are all items listed in Aluf's Product Catalog in stock?

Yes, all listed items are in stock and available for immediate shipment unless otherwise noted. However, to keep inventory current, periodically new items are added and obsolete items removed from stock.

We also produce industrial products on a customer-by-customer basis with low minimums and prompt turnaround.

What are the lead times for stock and custom product?

Orders for stock product will ship in 72 hours, stock with Co-label in 5 business days. Custom product lead time for first order is four weeks and three weeks for subsequent orders. Exceptions apply; lead time will be confirmed at time of order.

Interesting Aluf Plastics Facts

- Aluf's various can liners have been used inside the White House and aboard Air Force One.
- Aluf manufactures premium can liners of all sizes ranging from 6 inches to 157 inches wide.
- Aluf Plastics stocks over 50 different 55 gallon liners for immediate shipment.
- Aluf's bags are subject to meticulous testing to ensure product meets or exceeds industry standards.
- Aluf Plastics has 90+ state-of-the-art extruders, running 24 hours a day.
- Aluf Plastics is the second largest blown film plant in the United States.

- Aluf has the only 3-ply can liner that qualified for LEED certification with COEX antimicrobial odor control.
- Aluf Plastics won the P.L.M.A. salute to excellence award for outstanding packaging innovation.
- Aluf Plastics is recognized by INC/5000 as one of the fastest growing companies in the USA.
- Aluf Plastics is proud to manufacture and sell products that are made in the USA.
- Aluf produces Blue, Green, Yellow, Buff, Gray, Red Silver, Orange, White, Purple, Brown, in addition to Black and Clear.

Aluf Plastics Terms and Conditions

Returns

The Aluf Plastics tagline is "our reputation in every bag" — as we are very committed to ensuring customer satisfaction and providing quality product. In the event there is a need to return product to Aluf Plastics, a **Return Merchandise Authorization (RMA)** must be obtained by contacting returns@alufplastics.com within 7 days of delivery. The Request for Return Merchandise Authorization email should include the **Original Invoice Number, Date, Quantity, and Reason for Return**.

If a returned item is found to be defective or delivered damaged, returns with an RMA will be accepted at no outgoing freight charge and full credit will be applied to the customer's next invoice.

No credit will be given for custom/private label product, partially used packages or dead stock, unless defective.

All products accepted for return must be in unopened boxes, in resalable condition and are subject to a 15% restocking fee with no credit given for outgoing freight costs. After returned product is received in our warehouse, the amount paid for the product, less restocking fees (if applicable) will be credited on the customer's next invoice. Claims for shortages must be noted on bill of lading at time of delivery.

Product Warranty

User assumes all risks resulting from the use of our products and must confirm adaptability thereof by their own tests. Liability will not exceed value of the material sold. We reserve the right to employ various new technologies due to advances in the polyethylene industry which may alter the structure or configuration of material used to manufacture products. This does not void or change our warranty; the products supplied will function in a satisfactory manner.

Legal

Prices are subject to market changes and raw material price fluctuations. Prices quoted are firm for 30 days unless otherwise noted. Custom bags are subject to +/- 25% quantity unless otherwise agreed to in writing. All products are subject to +/- 5% overall tolerance.
