

GREEN FACTS

1,000 TONS OF CARDBOARD RECYCLED YEARLY: THIS IS EQUIVALENT TO **200,000,000 NEW SHEETS** OF COPY PAPER

100 TONS OF STEEL RECYCLED YEARLY: THAT'S ENOUGH RAW METAL TO MANUFACTURE **83 NEW CARS**

1.2 MILLION GALLONS OF WATER RECYCLED YEARLY: THIS WOULD FILL OVER **2 OLYMPIC SIZED POOLS**

3,000 GALLONS OF OIL RECYCLED YEARLY: THIS MEASURE OF GAS CAN DRIVE A CAR **9 TIMES ACROSS THE USA**

50 MILLION LBS OF PLASTIC RECYCLED YEARLY: THIS AMOUNT WEIGHS AS MUCH AS **45 AIRBUS A-380 AIRPLANE JETS**

10% POST-CONSUMER CONTENT SCS CERTIFIED: THIS CERTIFICATION QUALIFIES FOR MOST LEED AND EPP PROGRAMS

"We are committed to manufacturing environmentally friendly and ecologically responsible products, to help protect the environment and sustain our natural resources for current and future generations."

WE THINK GREEN

As a trailblazing leader in the can liner and bag industry, ALUF provides customers with a wide variety of green-friendly products.

We proudly boast a number of earth-friendly lines and solutions that will minimize your carbon footprint and maximize your environmental initiatives.

Our passion for continually upping the bar in eco-friendly attributes makes ALUF the ideal partner for taking your green initiatives to the next level.

Looking to establish a genuine relationship with a company upholding sustainable business practices that truly helps Planet Earth? Turn to Aluf, and let's "go green" together.

Aluf's 4-R Principles: Making Earth Cleaner

How does a company actually show concern for the planet?

It begins by creating a strong set of Environmental Best Practices. These Principles act as a blueprint for our many eco-friendly initiatives.

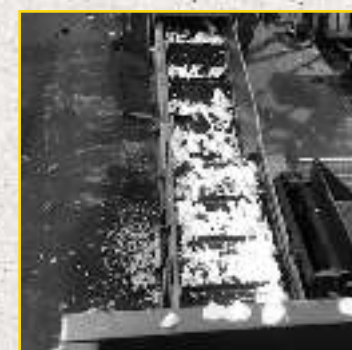

FROM PRODUCT TO PLANET

From start to finish, here is how Aluf puts more "green" into every bag.

SCRAP SOURCING

Aluf sources used and misprinted plastic for repurposing in plastic can liners and bags

MATERIAL RECYCLING

After inspection and grading scrap materials are prepared for our recycling process

RESIN PRODUCTION

Plastic is responsibly recycled into resin pellets for use in manufacturing

MANUFACTURING PROCESS

Pellets are extruded and converted into blown film-based products

ECO-FRIENDLY OUTCOME

A full lineup of green-friendly products are proudly sold bearing the aluf label

JOIN THE GREEN INITIATIVE

DID YOU KNOW?

By using a proprietary tri-laminate process, Aluf's COEX line of bags use less plastic than competitor's bags - reducing waste - yet provide superior strength and durability.

POPULAR UPCOMING GREEN PRODUCTS WITH UP TO 70% POST- CONSUMER CONTENT:

- CONTRACTOR BAGS
- KITCHEN BAGS
- PREMIUM BAGS

Looking to generate more LEED credits?

Seeking certification for your in-house recycling program? Want to achieve specific LEED certification goals? Look no further than ALUF.

From a unique COEX Supertuff CXP line produced from 80% recycled material and 10% post-consumer content, to virgin film products that pass the green-friendly test by using considerably less material, we have it all.

Our goal is to provide you with a robust can liner and trash bag lineup that reduces stress on the environment ... while uniting us as we proudly take a bigger step toward saving the planet.
