

# Low Density Repro

## Curbside Receptacle Liners

Curbside Receptacle Liners are specifically designed to fit standard 65 and 95 gallon roll out receptacles. They are made from low density polyethylene for strength and flexibility. Curbside Receptacle Liners are available in Black and Clear for general refuse and building materials and are gauged accordingly.

- Recycled liner, low density polyethylene
- Puncture and tear resistant
- Designed to fit standard 65 and 95 gallon curbside receptacles

 <b>REDUCE</b> Hi-tech machinery minimizes material used in production	 <b>REUSE</b> Internal waste, such as wastewater and cardboard, is reused
 <b>RECYCLE</b> Over 60% of lineup consists of 90% recycled material content	 <b>RECLAIM</b> Post-consumer and post-industrial recycling collection program

**IDEAL FOR**
