

50% RECYCLED, 100% STRONG.

TRASH DAY JUST GOT CLEANER™

neatbi TRASH BAGS

MADE WITH **BIOFLEX** TECHNOLOGY

TOUGH ENOUGH FOR ANY TRASH, WITHOUT TRASHING OUR PLANET.

BioFlex is our exclusive formulation of additives which enhance the biodegradation of Neat Bio trash bags in a biologically active landfill (not available in all areas). Other bags stick around for decades, centuries or forever, like they can't take a hint that the party's over.

ASTM D5511 tests that represent biologically active landfills on a representative Neat Bio trash bag have shown about 25% biodegradation in 365 days.

NO LEAKS

Thicker than other brands to hold up to your heaviest trash and liquids.

NO RIPS

Ultra-Force™ technology for more stretch to handle more trash without ripping.

NO SLIPS

Reinforced band grips your can, so the bag stays up no matter how full it gets.

NO PEEKS

Black outside for trash privacy, white inside for a clean look.
