

YOU ARE OVERPAYING FOR YOUR POLY SHEETING.

Why? What Aluf is finding is that the gauge that is on the box may not be the actual thickness of the material. Therefore you may be overpaying.

Aluf is offering a **free lab analysis of the thickness of poly sheeting**, along with a price quote on the true gauge. This will give you the ability to make the correct comparison.

Included in this sample kit you will find:

1. Samples of our stock polysheeting.
2. Postage paid envelope.

Please send us a small sample of the roll for testing. Once completed we will provide the results and comparative quote. This will enable you to determine the best pricing for your needs.

ITEM CODE	SIZE	GAUGE	CASE LAYER	PALLET
PS09400.31	9ft x 400ft sheeting	7.8 Mic	19	152
