

WHERE ARE YOU ON YOUR JOURNEY TO SUSTAINABILITY?

Whether you're an eco-starter or an environmentalist, we're all looking to make smarter choices for our planet. Reducing pollution, shrinking landfills and keeping natural resources intact are all paths that lead to a more sustainable future. **Wherever you are on your sustainability journey, we've got a bag for you.**

Compostable Bags

BPI Certified and made with natural polymers, including potato and corn starch and meet ASTM D6400 specifications. Bags are able to decompose under specific conditions of light, moisture and oxygen.

Reprocessed Bags

Made with at least 90% recycled materials, up to 20% post-consumer content, our proprietary formulation of sustainable materials outperforms the competition.

Reduced Resin Content Bags

Less polyethylene than traditional liners yet strong and durable enough to get the job done.

**OUR PRODUCTS
ARE PCR COMPLIANT
UP TO 30%**

Enhanced Biodegradation Bags

Bioflex trash bags are designed and tested to completely biodegrade in about 4 years in biologically active landfills. *ASTM D5511 tests that represent biologically active landfills on representative packages have shown biodegradation within the complete range in 4 years.

Our Sustainability Journey

- We operate our NY and TX manufacturing plants as zero waste facilities
- All internal plant scrap gets reincorporated into our products
- Every year we recycle 50 million pounds of plastic packaging
- Our facilities reuse over 25,000 gallons of wastewater a week
- Each year we recycle 1,000 tons of cardboard
- 3,000 gallons of oil from our machinery is recycled yearly
- As part of our buy-back program, we source scrap from other manufacturers and end users that we recycle to make new bags
